Polic—The Second Look

The decline in new polic cases in 1957 was truly one of ear's greatest blessings. But while we're saying "hat's to the Selk vaccine, let's take a closer look at the polio meture is it really over? Can we now sit back and say geodbye to one of the most dread costly and tragic of

trees of thousands of disabled polic patients know better. And to do March of Dimes volunteers now conducting the summer fund drive here and throughout the country. They ean show you how visible polic is on the national scene.

For one thing they will point to the fact that 300,000 cliving Americans have had paralytic polic, half of them sharing the past decade. The National Foundation for Infantile Paralysis estimates that one out of three of these souls have some form of disability that can be remedied or collected.

The volunteers will also tell you about the 57,800 police patients who heeded care and rehabilitation in 1957. That sock \$21,700,000 in March of Dimes funds. What is especially significant is that only 4,800 of them contracted police last their. The rest—53,000—were victims of former years who sail needed help. They'll need help this year, too, many of those. The March of Dimes has allocated \$21,100,000 for their care and rehabilitation.

There are not statistics. They're real people. The child the crotches standing on the studings watching others they's police is maspained and respirator centers, you have it is the steady prosiling of the fron line bellows you can see it in the thin sem dangling at the side.
